** BioSafe Package includes centrifuge and HEPA filter kit.

1 In Vitro Diagnostics Use.

2 For research use only. Not for use in diagnostic procedures.

XPNs can be programed to have changes in speeds during the sample centrifuge run to optimize purity + time, which can help your density gradient achieve equilibrium faster

Type 50.2 Ti 337901

- Small scale rotors are ideal for designing experiments with minimal sample
- Large scale rotors are ideal for production and manufacturing
- While swinging bucket rotors can purify viral vectors, the longer run time, lower volume per run, and comparable resolution make it a less attractive rotor for purifying viral vectors at scale
